

I would like to comment on the broadcast service LPFM. I listen to KLOVE radio on 101.9, 102.7, & 88.3. I travel throughout N Calif and all of these stations benefit me. These are important stations in our community and do not need to be removed by a LPRM signal. There are many types of stations out there and I am afraid I would lose this type of programming to something that I do not want to listen to. There would then not be any station for me to listen to. KLOVE offers many things for the public interest including: clean, wholesome music, help lines for those people who are facing difficulties in their life, and spiritual help for those in need. I have even heard that these stations have been responsible for stopping people from committing suicide by giving out emergency help numbers. Please do not let LPFM broadcasts override these stations. It is imperative that this not go through.

Sincerely,
Erick Mattson
